HISTORY/FACTS/ISSUES:

It is anticipated the additional federal funding for County projects will be forthcoming either directly from the United States Department of Transportation Federal Highway Administration (FHWA) or another "stimulus" bill. In the past we have been able to provide shovel ready site(s) for consideration and have been able to develop plans expeditiously. However, the Florida Department of Transportation has been tightening up the timeline with each phase and it is anticipated that shovel ready status will be required to mean just that. Public Works has recommended that engineering plans, specifications, and bid documents preparation commence now for C-476B, between I-75 to C-476, which serves both the Federal Cemetery and the Sumter Correctional Institute, in anticipation of this next round of funding. To this end, Public Works requested a proposal from Volkert and Associates, Incorporated (VAI). Attached is VAI's proposal for this work, as well as, design Work Order #17 for consideration and approval.

A budget amendment has been requested through the budget office.
